The idea behind Front Panel Designer

Front Panel Designer is a design and ordering program available free from Schaeffer AG. Using our software you can design and create your own customized front panel within a very short time - without any previous experience!

Front Panel Designer offers you the following features:

- drilled holes, cutouts, curved slots, threads and countersunk holes
- chamfers and radii
- system holes for standard 19" front panels
- macro objects
- text engravings and engraving objects
- HPGL engraving import
- DXF import for free contours
- DXF, SVG, PDF, and STEP export of your file
- graphics import (PDF, JPG, PNG, BMP, TIFF)
- price calculation
- order processing

Material and manufacturing costs can be calculated at any time by Front Panel Designer. Send your completed file directly to the Schaeffer AG order processing department online using Front Panel Designer's integrated ordering function.
