Machine Parts

With our modern milling technology we can manufacture a wide variety of forms. Take advantage of the flexibility of Front Panel Designer to create customized milled parts with thicknesses of up to 15mm. Greater thicknesses are also possible upon request. Naturally the entire range of features in our software is available to you here as well. Design your components with millings, holes or cutouts to meet your specific needs. A large selection of materials is available for this purpose ranging from aluminum and brass through to acrylic and PVC.
